

1 This listing of claims will replace all prior versions, and listings, of claims
2 in the application:

3
4 **Listing of Claims**

5
6 **Claim 1 (Currently amended):** A user interface comprising:

7 a full scale image presented on a screen for display, the full scale image
8 being generated from a full scale video stream received from a content provider;

9 a scaled image, which is scaled from the full scale image, overlaid onto a
10 portion of the full scale image for display, the scaled image being a scaled
11 representation of the full scale image and generated from a compressed video
12 stream received from the content provider, the compressed video stream being a
13 compressed version of the full scale video stream; and

14 a graphical user interface positioned next to the scaled image overlaid onto
15 the full scale image for display without obscuring the scaled image.

16
17 **Claim 2 (Original):** The user interface of claim 1 wherein the full scale
18 image is a different format than the image.

19
20 **Claim 3 (Original):** The user interface of claim 1 wherein a user
21 determines a format of the full scale image and a format of the scaled image.

22
23 **Claim 4 (Currently amended):** The user interface of claim 1 wherein the
24 full scale image is a full scale video image, and wherein the scaled image is a
25 scaled video image of the full scale video image are similar in appearance.

26
27 **Claim 5 (Original):** The user interface of claim 1 wherein the scaled image
28 is placed along a left side of the full scale image.

1 **Claim 6 (Original):** The user interface of claim 1 wherein a user
2 determines where the scaled image is overlaid onto the full scale image.

3
4 **Claim 7 (Original):** The user interface of claim 1 wherein the graphical
5 user interface is configured to receive instructions from a user to provide a
6 different graphical user interface.

7
8 **Claim 8 (Currently amended):** A method in a client device comprising:
9 receiving a full scale video stream from a content provider;
10 receiving a compressed video stream from the content provider, the
11 compressed video stream being a compressed version of the full scale video
12 stream;

13 displaying a full scale image on a screen generated from the full scale video
14 stream;

15 overlaying an a scaled image of the full scale image onto a portion of the
16 full scale image for display, the scaled image being a scaled representation of the
17 full scale image and generated from the compressed video stream; and

18 placing displaying a graphical user interface next to the scaled image
19 overlaid onto the full scale image without obscuring the scaled image.

20 **Claim 9 (Original):** The method of claim 8 wherein the scaled image is a
21 different format than the full scale image.

22 **Claim 10 (Original):** The method of claim 8 wherein the scaled image is
23 placed along a left side of the full scale image.

24 **Claim 11 (Original):** The method of claim 8 further comprising receiving
25

1 an instruction from a user to modify information presented by the graphical user
2 interface.

3 **Claims 12-62 (Canceled)**
